

Insurance Mobile Solutions

Customer Self Service - Property & Casualty

Solution Description

The application provides easy to use functionality for the end consumer to capture accident information, report a claim, track the claim to closure and minimize or control losses. In the event of an accident, the customer can easily navigate through intuitive prompts to collect and store essential information such as driver information, witness information, accident location and photographs.

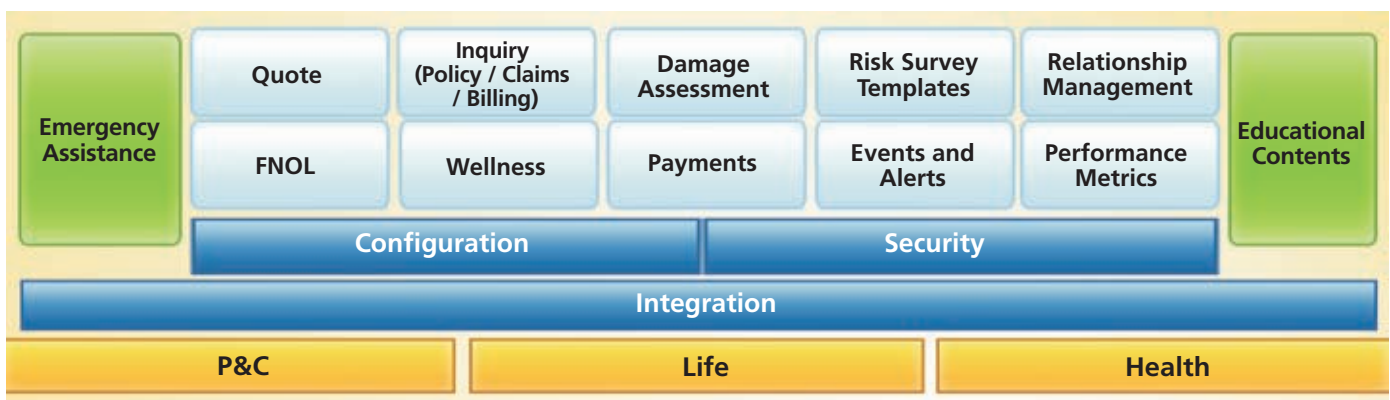

Features

- FNOL
- Photographic evidence integrated as proof of the accident
- Emergency services, send help notification
- Integrated GPS capability to locate nearby tow / garage facility
- Track claim status
- Injury information
- Accident / first-aid information guide

Business Benefits

- Reduced turnaround time for claims processing
- Enhanced customer service and user experience
- Immediate support from service providers thus minimizing loss
- Reduced cost of claims processing
