

Need More Help? Then read the following FAQs for clarity:

1. *Will I be given training before joining L&T Infotech?*

Yes. On selection at L&T Infotech, all trainees undergo 'Enabling the Champions' Program, which consists of:

- Pravesh - a pre-induction programme.
- Induction and Training Program

For more details about 'Enabling the Champions,' read about the learning we provide to Campus Graduates from Technology Institutes.

2. *What documents need to be submitted on the day of joining?*

On the day of joining, it is mandatory to show the original documents and submit the attested copies of the same. The list of documents to be submitted on the first day will be communicated to you before your date of joining.

3. *What should I do in case of change in my contact details?*

In case of change in contact details, send an email to the ID provided in the offer letter. State your name, date of birth, Pravesh ID and your institute's name in the email. We will update your contacts details in our database.

4. *How important is it to attend Pravesh?*

Very important. Pravesh prepares you for our rigorous training program Enabling the Champions. Attending Pravesh will help you strengthen your fundamental IT skills. It is important that you make a special note of your Pravesh ID.

5. *What kind of career growth can L&T Infotech offer me?*

Meritocracy and fair-play drive all decisions about people management at L&T Infotech. We give opportunities that will help them grow both professionally and personally. If after gaining a few years of technical exposure, trainees would like to play a customer and business-related role, we have various Career Tracks available. For more details, read about the excellent growth prospects at L&T Infotech.

6. *What kinds of projects / technologies are available to work on?*

We provide services and solutions in areas such as SOA (Service Oriented Architecture) and Web Services, Infrastructure Management Services (IMS), Web & Portal Technologies, Business analytics, EAI (Enterprise Application Integration) Solutions, Mainframes, Embedded System, Performance Engineering, Legacy Modernization, Testing, RFID and Robotics. On completion of 'Enabling the Champions,' you will be allocated to projects based on business requirements.
