

INDUSTRY

Banking & Financial Services

Enhancing quality and predictability through testing

BUSINESS BENEFITS

The independent quality assurance initiative delivered several benefits like streamlined releases, centralized control and project predictability. The end-result is a high-high quality, seamless experience for the bank's customers.

L&T Infotech carried out independent verification & validation for a corporate banking portal, testing multiple modules in an aggressive time-frame

THE CLIENT

Our client is amongst the top three banks in the United Kingdom.

THE CHALLENGE

Our client had replaced two legacy systems with a corporate banking web portal and needed testing and quality assurance services for the new system.

THE SOLUTION

We carried out independent verification and validation for our client's corporate banking web portal. The web portal provides balance and transaction reporting for multiple legal entities and currencies for corporate customers. It deals with payments and collections. It provides support for fast payments, SEPA and extends the solution for multi-currency overseas customers in a staggered fashion.

Independent functional testing of modules like:

- Balance & Transaction Reporting
 - Payments & Collections
 - Beneficiaries & Debtors
 - Multiple Legal Entities
 - Historical Balance & Transaction Reports

- Preparing test data and scheduling testing with interfacing systems
- Developing simulators for functional testing, performance testing
- Effective regression testing to ensure maximum coverage of impacted scenarios
- Schedule slippages in the development phases due to other vendors were absorbed in the testing phase by working in multiple shifts

L&T Infotech is a 100% subsidiary of the US\$ 7 billion, technology-driven engineering and construction major, Larsen & Toubro. We offer comprehensive, end-to-end software solutions and services to leading companies across the globe. We provide the winning edge to our clients by leveraging our business-to-IT connect and deeply committed people.
