Comprehensive
application
development and
support

BUSINESS BENEFITS

- Substantial and measurable cost benefits from our offshore delivery model. This model also reduced total cost of ownership
- Scalable products
- Easy-to-maintain applications with further development and technology support

L&T Infotech deployed their global delivery model to reduce total cost of ownership for a leading HVAC equipment manufacturer.

THE CLIENT

Our client is a US-based manufacturer of air conditioners, cooling and heating systems for houses as well as small, medium and large sized buildings.

THE CHALLENGE

Our client needed wide-ranging application development, including:

- Legacy applications needed to be transformed using the latest technology to retain business knowledge
- Existing applications needed to be web-enable for higher efficiency
- Several applications needed to be enhanced
- Disparate applications needed to be integrated so data could be shared

THE SOLUTION

Our solution covered the following:

- Study and detailing of business requirements
- Requirement analysis
- Evaluating and suggesting software platform
- Design
- Development
- Testing
- Providing assistance in installation and acceptance testing
- Suggesting hardware configuration

For development projects, requirements were gathered onsite our team. All the other phases of the project, including unit testing, were carried out offshore. The deliverables were packaged and sent to the client for implementation through onsite coordinators.

L&T Infotech is a 100% subsidiary of the US\$ 7 billion, technology-driven engineering and construction major, Larsen & Toubro. We offer comprehensive, end-to-end software solutions and services to leading companies across the globe. We provide the winning edge to our clients by leveraging our business-to-IT connect and deeply committed people.
