

INDUSTRY

Telecom Product Engineering Services

Delivering high quality through testing

BUSINESS BENEFITS

Our domain experience and quick ramp-up of suitable resources have helped our client to off-load the entire volume of testing work offshore, without sacrificing quality and stringent product launch schedules. We are also helping the client enhance their proprietary tools to support multiple protocol interfaces.

L&T Infotech has set up an Offshore Delivery Center that handles the complete testing load for a US-based handset major.

THE CLIENT

Our client is a global handset major based in USA.

THE CHALLENGE

The client was seeking a partner who would provide comprehensive, secure, reliable and cost-effective testing services.

THE SOLUTION

We have established an exclusive Offshore Delivery Center for the client that conducts projects related to its handsets. The engagement with the client began with integration testing, in which software and/ or hardware components were tested, in order to evaluate the interaction between them. Projects currently executed at the offshore development center include:

- Integration testing
- System testing
- Test case automation
- Application development
- Tool development
- White box testing for upcoming CDMA dual mode phones

L&T Infotech is a 100% subsidiary of the US\$ 7 billion, technology-driven engineering and construction major, Larsen & Toubro. We offer comprehensive, end-to-end software solutions and services to leading companies across the globe. We provide the winning edge to our clients by leveraging our business-to-IT connect and deeply committed people.
