## Consumer Packaged Goods

Delivering a platform for future business growth

### BUSINESS BENEFITS

Our teams delivered a state-of-the-art IT solution within the agreed timelines at competitive costs. Our thorough project execution methodology resulted in high operational stability and system reliability. The project created a highly flexible, agile platform and ensured successful change management.

L&T Infotech worked with a leading CPG company post their merger with a global giant. The project created one of the largest SAP systems in the world with minimum business disruption.

### THE CLIENT

A leading global consumer product manufacturer, whose products are household names across the world.

### THE CHALLENGE

Our client merged with the world's #1 maker of household products, triggering the need to ensure operational stability and flexibility. This called for integrating our client's systems with the IT systems of the parent company and creating a platform for current and future business growth. An upgrade from SAP ERP version 4.6 B to ECC 5.0 was necessary to ensure our client stayed within the range of releases fully supported by SAP for code fixes and changes in legal requirements.

### THE SOLUTION

The project created one of the largest SAP systems in the world. Our teams worked closely with the client to define requirements and develop the strategy roadmap. ZoomUp, our proprietary framework, was used to facilitate the execution of functional assessment. It provided a quick, quantitative and qualitative analysis of custom objects in the current and target system to identify potential failures resulting from the upgrade.

## HIGHLIGHTS

- The system downtime was maintained well below the agreed level.
- Our robust upgrade strategy reduced the impact on existing business processes and interfaces
- eCATT and Solution Manager based testing resulting in reduced testing time and minimized error-causing manual intervention. This also improved the quality of the upgraded system
- All systems were delivered on schedule. There were no show stoppers or major issues after upgrade

---

L&T Infotech is a 100% subsidiary of the US\$ 7 billion, technology-driven engineering and construction major, Larsen & Toubro. We offer comprehensive, end-to-end software solutions and services to leading companies across the globe. We provide the winning edge to our clients by leveraging our business-to-IT connect and deeply committed people.
