

ICDone™
Migration to ICD-10
"A complete solution towards the ICD-9 to ICD-10 conversion challenges"

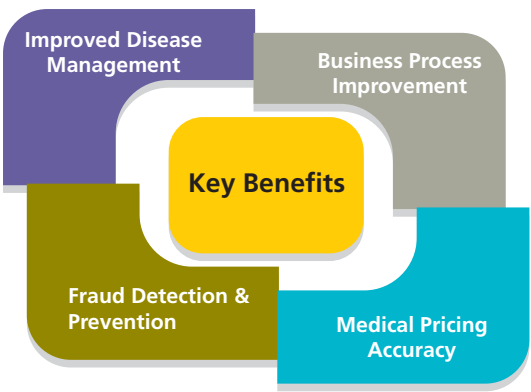

With the ICD-9 code set crossing over 30 years and becoming outdated, the conversion to ICD-10 has become a mandate due to ICD-9's limitation to accommodate new diagnosis and procedure codes, and the final rule has set forth a compliance date of October 1, 2013. ICD-10 allows over 14,400 codes and also facilitates tracking of many new diagnoses. However, such factors like the increase in number of codes, change in the number of characters per code and higher specificity are making the migration to ICD-10 complex. The transition will require significant planning and upgrades along with huge investments.

Understanding the complexity and investments involved in the transition, L&T Infotech has designed an innovative framework to simplify the process while paying equal attention to the risks involved. Our suite of services help healthcare providers, payers and clearinghouses / third-party billers deal with the migration process well before the compliance date and with minimal disruption.

Business Challenges of Health Industry

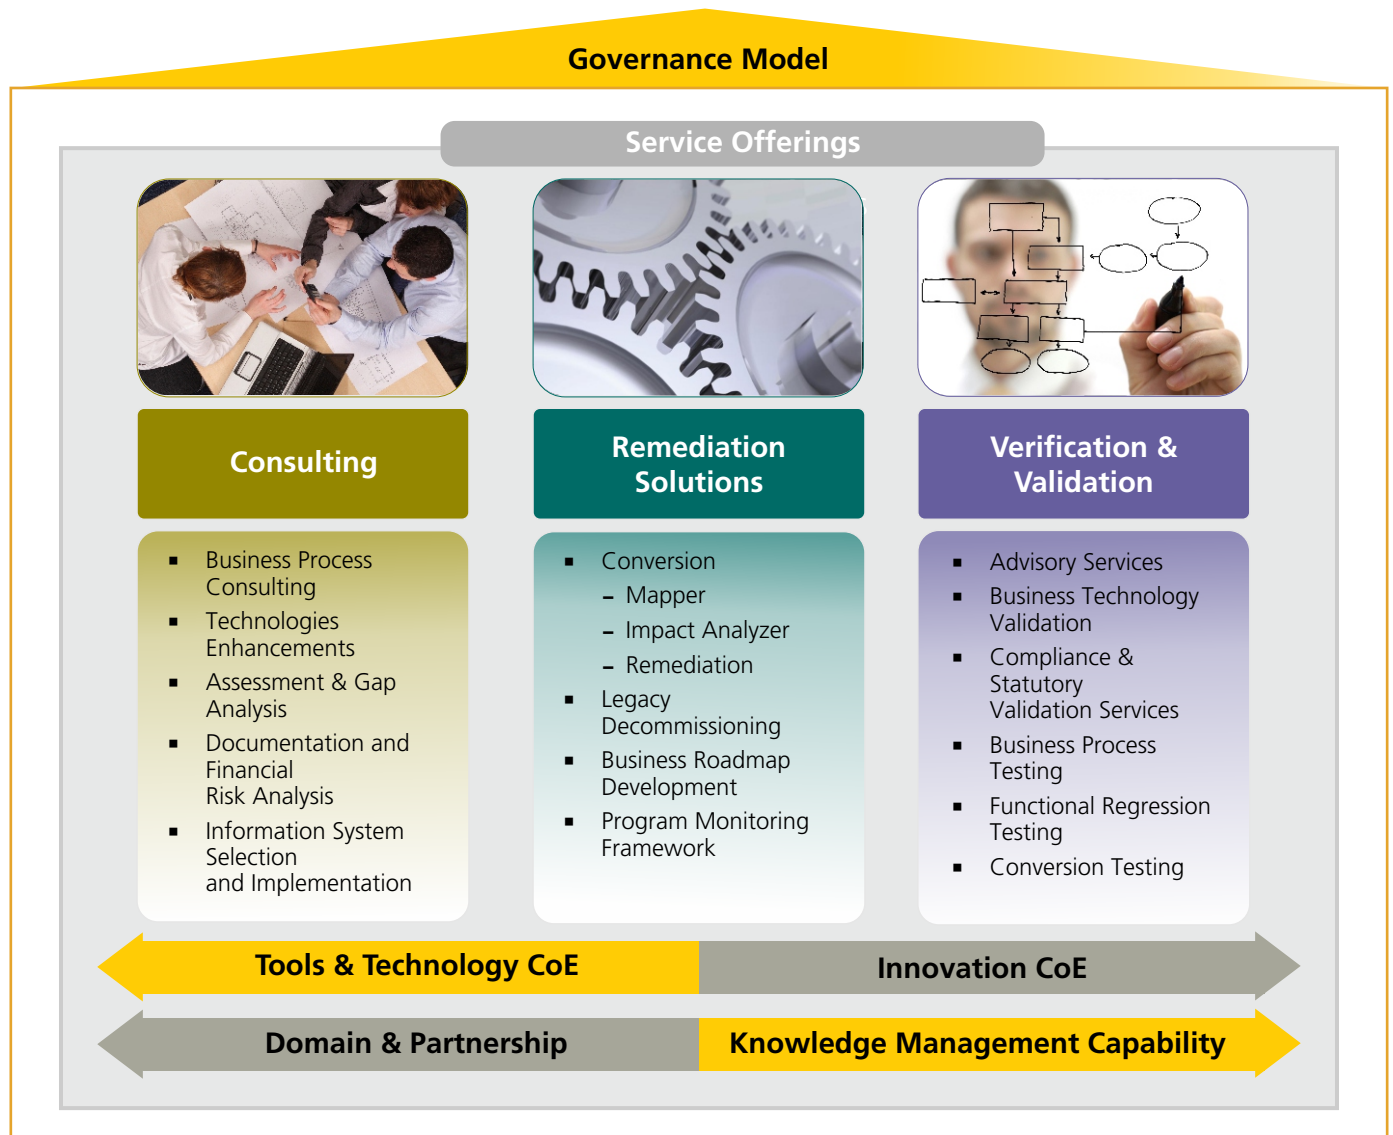

- Data standardization prior to and after ICD conversion to handle reimbursement and mass claim adjustment
- Technology enhancement – handling conversion during the claims adjudication process within the SLA limit
- Resource and budget constraints

**ICDone is a trademark of L&T Infotech*

Business Benefits

- **Accuracy and increased efficiency in:**
 - Claims payment and processing due to better mapping specificity leading to improved provider network contracting.
 - Data analytics and reporting processes; especially with respect to drug utilization and reimbursement
 - Medical pricing, by utilizing the appropriate decision rules
- **Reduction in:**
 - Number of appeals and grievances owing to granularity of data and payment hierarchy
 - Cost of implementation due to our investments in creating automated tools and solutions
 - Duration for implementing ICD-9 to ICD-10 conversion while leveraging the existing architecture and guidance from our healthcare subject matter expert
- **Prevention and detection of healthcare fraud and abuse**
- **No dependency for the readiness from external vendors and claims clearing houses in conversion**

About L&T Infotech

Larsen & Toubro Infotech Ltd. (L&T Infotech), one of the fastest growing global IT services company, is ranked by NASSCOM as the 6th largest software & services exporter from India and among the top 20 IT BPO employers in 2014. It is a wholly-owned subsidiary of Larsen & Toubro (L&T), a multi-billion conglomerate, and India's largest Technology, Engineering, Construction, Manufacturing and Financial Services organization, with global operations.

L&T Infotech is differentiated by its three-pronged value proposition, encompassing Business-to-IT Connect, Execution Excellence and Engage the Future. (www.Lntinfotech.com)
