

Solving Real World Challenges with Blockchain

Blockchain, or the Distributed Ledger Technology (DLT) as it is now called, is fast disrupting the way we do business. LTI is at the forefront of the Blockchain revolution, and can help you leverage this disruptive technology for exponential operational efficiencies. LTI's Blockchain services combine our core technology competence in this area, with strong domain capabilities in BFS, Insurance, Energy & Utilities, Media & Entertainment and Manufacturing, and are designed to help customers rapidly deploy and monetize from these solutions. LTI's Blockchain Readiness Index helps determine blockchain applicability, scalability, time-to-market and ROI.

Blockchain is a Distributed Network that

Blockchain Accelerator

A framework to Jumpstart your Blockchain Journey

Solving for Client Challenges across Industries

- Sovereign identity management solution for a large financial services company to reduce the cost of client onboarding, and create a user centric ecosystem.
- Micropayments solution to enable new revenue streams for Media Houses, from pay-per-view transactions.
- Trade finance solution for a leading bank to reduce the trade cycle time and cost.
- Global raw material marine shipment process for a CPG Major to enhance visibility and accountability in the supply chain.
- Asset registration and tracking for a government agency to safeguard buyers' and sellers' interests.
- Inventory financing solution for a leading manufacturer to bring the buyer, the supplier, and the bank on the same platform to enhance end-to-end process visibility and reduce cost of financing.
