Introduction

Organizations today are facing extreme challenges in terms of protecting their data systems, networks, and they are looking for a solution that will help them in tracking high risk assets and prioritize remediation efforts based on risk. LTI’s Cyber Risk Management Service provides risk-based visibility into enterprise assets and associated attack surface area.

LTI Cyber Risk Management Services

The LTI Cyber Risk Management Service ingests data from a variety of security and IT tools, as well as external threat data feeds. This technology-enabled service not only aggregates internal security intelligence and external threat data, but more importantly, correlates these data feeds with its business-criticality, or risk to the organization.

LTI’s Cyber Risk Management Services covers:
- Endpoints
- Mobiles
- Cloud
- IoT
- Security Devices
- Web-Applications
- Database
- Network Devices
The service continuously correlates vulnerability data with threat intelligence and business impact to assign a Risk Score for every IT asset in the service scope. This service uses advanced risk scoring and human-interactive machine learning technology that allows you to assign different levels of risk to assets, databases, web applications, and business processes. Based on this, the service can give consolidated risk scores for the technology in scope across any department, location, etc. A consolidated single risk score for the organization is also visible on the dashboard. These risk scores enable organizations to prioritize remediation efforts, and continuously have visibility into the attack surface area.

Key Features

- **Multi-Layered Technology Stack**
  Endpoints, Servers, N/W Devices, Security Devices, Databases, Applications, etc.

- **Lightweight, Non-Disruptive**
  Consumes negligible CPU. Runs in the background with a minimal footprint

- **High Privacy**
  Does not invade on user privacy & has no impact on the way users use their favourite apps & access data

- **Quick Remediation**
  Provides Quick Remediation measures with notification features. Integrates with Ticketing system, SIEM, AV, etc.

- **Real-Time Visibility & Intelligence**
  Visibility into threats & risks across the technology stack of the organization

- **Easy Deployment and Integration**
  Combination of Agent & Agentless deployment depending on technology

- **“Always On” Risk Score**
  At Enterprise level, and every single Asset level across geographies 24/7

- **Compliances**
  Controls mapped against global compliances & Best practices

- **Prioritization**
  Prioritize the Remediation across your Critical Assets, most vulnerable technology verticals
Key Benefits

- Enable prioritized remediation
- Quantified risk-based dashboard view of the organization’s cyber security posture
- Monitor and reduce Attack Surface Area
- Real-time visibility of risks, control implementation across best practices & compliances
- Preserve existing technology investments and enhance their value by automating the data aggregation, correlation, and normalization process

LTI (NSE: LTI, BSE: 540005) is a global technology consulting and digital solutions Company helping more than 250 clients succeed in a converging world. With operations in 27 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI’s Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys. Founded 20 years ago as a subsidiary of Larsen & Toubro Limited, our unique heritage gives us unrivaled real-world expertise to solve the most complex challenges of enterprises across all industries. Each day, our team of more than 20,000 LTItes enable our clients to improve the effectiveness of their business and technology operations, and deliver value to their customers, employees and shareholders.
