

Let's Solve

## Case Study

Leading Energy Corporation Improves its Volume Handling Capacity in Treasury and Capital Accrual Processes by 20% with LTI's Intelligent RPA

A Larsen & Toubro  
Group Company

# Client

Leading Energy Corporation

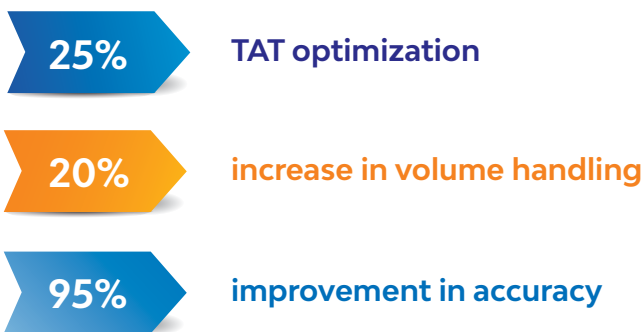

## Challenges

- Multiple iterations in data sanitization in certain operated and non-operated capital accrual processes due to manual errors in data entry
- Low turnaround time.

## LTI Solution

- LTI implemented an end-to-end solution for all the rule-based activities involved in the capital accrual process.
- The capital accrual file formats were digitized into standard templates to extract information based on pre-defined rules.
- Data entry, validation, creation of the current month capital accrual file, and confirmation notification, were all done using RPA.
- Exception handling was also factored in the process design, where bots notify analyst with exception information for a faster RCA and BAU.

## Business Benefits Delivered

LTI (NSE: LTI, BSE: 540005) is a global technology consulting and digital solutions Company helping more than 300 clients succeed in a converging world. With operations in 30 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI's Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys.
