

Let's Solve

Cloud X-Ray | Save Cloud Costs with LTI's Automation Solution

As a strategic move by enterprises to reduce cost, mitigate risk and achieve scalability of database capabilities, adopting cloud could go a long way. Migrating to cloud can be easy, but it may not save intended costs. Optimise your overall cloud strategy with automation to experience breakaway outcomes.

Why Cloud X-Ray

LTI's Cloud X-Ray - is an automated tool that can help you save 20% of the cloud costs. It extracts the cloud usage data from cloud-native end-points and builds a data model. It also analyses changes in the cloud infrastructure and remediates non-compliant resources.

This is how we do it:

Discover cloud

Most enterprise organisations don't even fully know what they have in the cloud

Low hanging fruit

Deploy out-of-the-box "Bots" to capture immediate value

Explore data

Begin to understand the scope, dynamics, and unique challenges of your environment

Build policy

Define policies that are important, whether for security, cost, governance, data lifecycle or other

Automate policy

Build "Bots" to bring autonomously solve problems both retroactively and moving forward

Optimise cloud

Programmatic automation to analyse and correct cloud infrastructure per user defined rules and actions

What our Bots do?

Validate tags

Auto backup

Volume clean up

Resource resize

Min/Max CPU

S3 security

LTI's Cloud Expertise

Cloud strategy & roadmap

- Cloud advisory & assessment
- Application portfolio assessment
- Business case & TCO analysis
- Architecture strategy & roadmap

Cloud platform build & migration

- Re-factor, re-host, re-architect
- Public, private or hybrid cloud design
- Cloud re-mediation
- Pilot migrations with pre-migration testing

Cloud operations services

- 24*7 monitoring & administration
- Server & OS management
- User & security management
- Billing & chargeback
- Next gen operations

Cloud enablement services

- Native cloud development
- Backup & DR service
- Workspace service
- DevOps service
- SAP on Azure
- JD Edwards on Azure

A Larsen & Toubro Group Company
