

Let's Solve

Case Study

Data Mapping & Privacy strategy with hybrid approach for US-based Manufacturer.

A Larsen & Toubro
Group Company

Client

Leading US-based manufacturer and global provider of comprehensive photovoltaic (PV) solar systems.

Challenges

Lack of understanding in identification & classification of personal / special data attributes

Assessment of current gaps with regards to US and EU (CCPA & GDPR) Privacy Regulation

Limited understanding of where personal / special data attributes reside in structured and unstructured forms within the organization

LTI's solution

LTI's two-pronged approach consisted of using pre-defined templates and checklists for interviews with business process / system / application owners, and an automated tool for scanning both structured & unstructured data assets.

Identified and classified all data attributes considered personal / special categories according to privacy regulations using interview outputs and automated scan results, to create a Data Asset Inventory

Analyzed the current gaps with regards to the four key tenets of compliance regulations i.e. Technology, Data, Process & People and devised strategy for remediation

Provided "confidentiality" scores to data attributes per regulation, and scored them on "Integrity" & "Availability", based on LTI Assessment to highlight Impact / vulnerability areas for clients to remediate on priority

Provided an actionable remediation plan to implement consent management and address data subject rights management.

Tools / Technologies used - LTI's PrivateEye, SQL database, SAP, MS excel and presentation.

Business Benefits Delivered

80% Reduction in efforts for future Data Mapping

39 business processes covered by Data Mapping

443 Data attributes identified

LTI (NSE: LTI, BSE: 540005) is a global technology consulting and digital solutions company helping more than 360 clients succeed in a converging world. With operations in 30 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI's Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys.
