Enterprises today are experimenting with radical ideas, to innovate and transform their business by implementing technology solutions. We call these the Breakaway Enterprises of the era - their path-breaking adventures are not only inspiring, but also testimony to the fact that Change is Good.

One such vital change catalyst is Intelligent Automation.

Here are the 7 steps you need to take to transfigure into the breakaway enterprise of the future.

1. **Change of Mindset**
   - Challenge the prevailing mindset in your organization. How you define automation and communicate about it with respect to your business objectives will make or break the case. Deal with naysayers by educating on benefits of automation.

2. **Use Automation as Productivity Booster**
   - Intelligent Automation levers such as Robotic Process Automation can be scaled up when required to take on new tasks or more work, enabling higher output as needed.

3. **Automate to Move People up the Value Chain**
   - Enable automation at all levels by making it an essential part of your organization’s DNA rather than a mandate. This can be achieved by initiatives like creating a bot university, automation champions, HumBot communities, etc.

4. **Inculcate Automation in Your Organization Culture**
   - Don’t start your journey with complex processes. Select the processes wisely by aligning them to your business goals. Automating quick wins will build more confidence around your journey.

5. **It’s a Long Haul Journey!**
   - As you progress, you may face new challenges along the way. It’s important to continue learning and adapting to stay ahead of the curve.

6. **What v/s When to Automate**
   - Starting your automation journey in small pockets, rejoicing your little victories and then replicating them towards bigger areas are the perfect ways to automating your organization to glory. Hence, it’s imperative to laud the efforts of everyone who contributed in this entire initiative irrespective of the magnitude of their roles to encourage them to adopt the initiative with open arms.

7. **Celebrate the Little Victories**
   - Reward your people for their contributions and recognize their efforts. Get actionable insights from the latest podcast and blogs on Intelligent Automation.
