A Larsen & Toubro
Group Company

Case Study

Kick-starting Enterprise-wide Automation Program for Leading Solar Power Company

LTI improved productivity, optimized processes and expedited resolution via RPA tools.

Client

The client is an American manufacturer of solar panels, and a provider of utility-scale photo-voltaic power plants and supporting services that include finance, construction, maintenance and end-of-life panel recycling.

Challenges

The client was looking to implement RPA across multiple lines of business. The client was facing challenges in delays caused by manual revalidation of financial documents, resulting in delays, as well as mismatch in values in some cases. The client was also struggling in developing reports from data coming from multiple sources, as well as in identifying exceptions for the same.

LTI Solution

LTI brought in a design thinking approach. We conducted joint sessions with the client to understand existing technological landscape, and identify the right processes and automation tools for implementation.

We extensively utilized our expertise covering the complete product life cycle from Development, Testing, Implementation & Enhancement.

The product has encountered few technical challenges in RPA implementation at the start of the project and LTI's expertise in solutioning has helped our client to overcome those challenges and made a viable RPA implementation.

Business Benefits

- **FTE optimization**
- **50% reduction in processing time**
- **99% accuracy achieved**

Technology

UiPath tool for process automation in SAP, ServiceNow and NRG application enterprise-wide

LTI (NSE: LTI) is a global technology consulting and digital solutions Company helping more than 400 clients succeed in a converging world.
