

Case Study

Data Governance Operationalization for Leading Insurance Services Firm

Client

The client is leading insurance & core professional services firm. The company also provides offerings like financial services, legal, information technology & investment advisory. Recently, the company has been recognized as the “Best Place to Work” in the insurance sector.

Challenges

Under-utilization of Collibra (Data Governance) platform

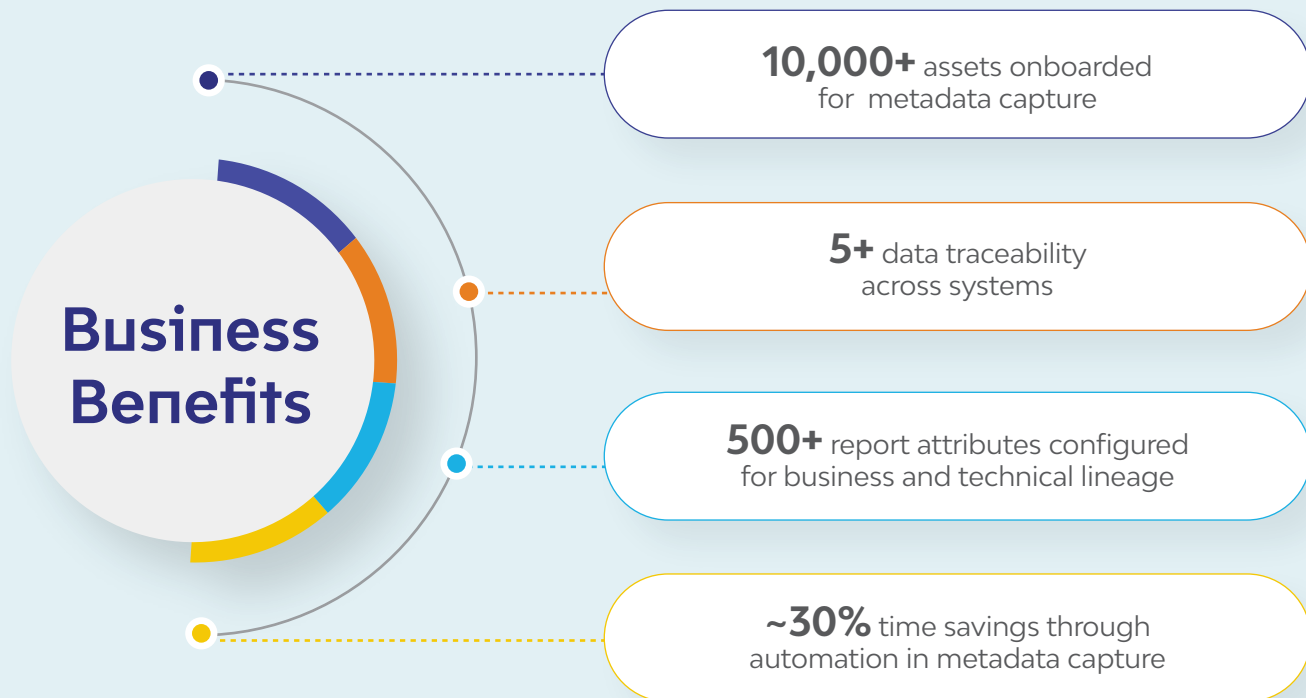

Lack of data governance operationalization strategy

Absence of automation for metadata ingestion

Unavailability of Collibra expertise

LTI Solution

- ▶ Designed and configured operating model in Collibra for Cognos Reporting.
- ▶ Configured organization structure, users, roles, and dashboards.
- ▶ Developed automation jobs for capturing metadata from SQL Server, IMM & Cognos.
- ▶ Established business and technical lineage for end-to-end data traceability.
- ▶ Configured workflows for report and asset certification.
- ▶ Formulated roadmap covering automation and operationalization.

LTI (NSE: LTI) is a global technology consulting and digital solutions Company helping more than 435 clients succeed in a converging world.
