Case Study

Digital Transformation, Improved Time-to-Market Leads to SMART Manufacturing for Market Leader

LTI helped the client transform into connected enterprise by digitizing the core.

Business Challenge

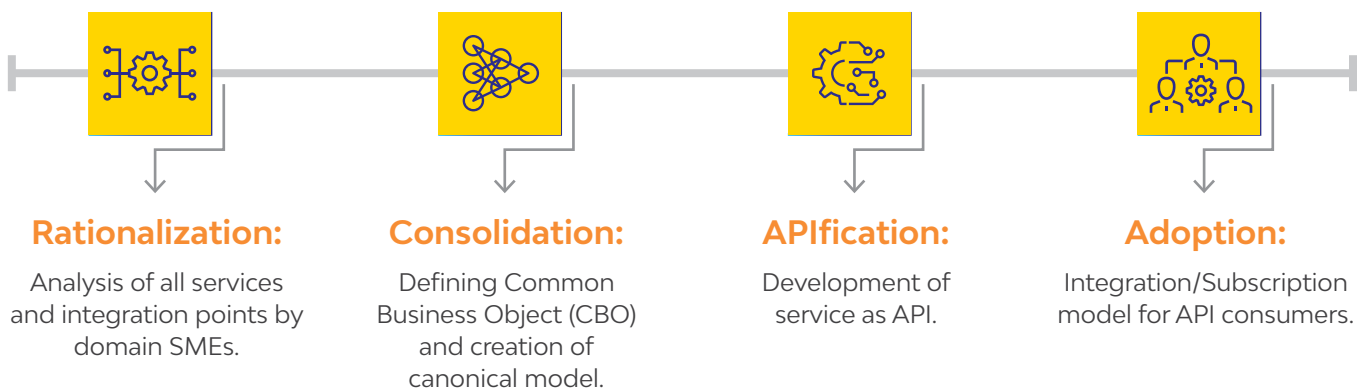

With a strong vision to become market leader, the client wanted to use “separation from parent unit” as an opportunity to achieve “SMART manufacturing and fully-integrated, real-time supply chain’ through digital transformation.

The client was facing challenges in terms of multiple ERPs in different regions, technology redundancy and managing 400+ integration points.

What LTI Did

LTI prepared a strategic digital transformation plan, defined measurable milestones, conducted extensive product and solution comparison, and charted out a full-fledged plan to digitize the core with API-led architecture. The transformation journey was carried out in four phases:

LTI leveraged its inhouse assets and tools (SIA) to fasten the whole transformation journey.

What Was Achieved

Successful consolidation of **400+ integration flows** into **45+ service APIs**

Reducing technical debt by replacing of **6+ tools** with one single tool

Self-service with less effort, time, and costs

40% improved time-to-market by CI/CD implementation

Key Takeaway

Empowering and making businesses future-ready through connected enterprise.

LTI (NSE: LTI) is a global technology consulting and digital solutions Company helping more than 435 clients succeed in a converging world. With operations in 31 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI's Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys. Founded in 1997 as a subsidiary of Larsen & Toubro Limited, our unique heritage gives us unparalleled real-world expertise to solve the most complex challenges of enterprises across all industries.
