

Case Study

Powering Rapid Digital Transformation for a Middle East-Based Diversified Business Conglomerate

Business benefits at a glance

Drove customer transformation into an intelligent enterprise by implementing function-as-a-service across 12+ functions

Delivered seamless insights from 30+ SAC stories, including for leadership, HR, finance, and project management teams, on SAP Cloud Analytics

Increased productivity and lowered development turnaround time through real-time reporting, standardization, and monitoring by leveraging the SAP Integration Suite

Streamlined complex integrations between SAP and non-SAP products

Digital transformation is driving growth in today's dynamic business environment. Implementing solutions that enabled them to meet new-age challenges was a key ask for our customer, a leading conglomerate in Qatar with interests across engineering & construction, entertainment, hospitality, food, real estate, manufacturing, and other services. The company was looking to implement a holistic solution across verticals to drive better harmonization of business processes, enable data standardization, accelerate digitization and automation for improved process maturity and efficiency, offer real-time analytics for quick decision-making, and also provide a handbook approach for M&As across industries. This included streamlining 23+ SAP products, 45+ SAP modules, and 100+ process blocks.

LTI leveraged its rich domain expertise and industry cloud solution to implement 10+ functional services through Business Technology Platform. More than seven solutions were delivered on the SAP Cloud Platform, including Supplier Collaboration Portal, Project Material Planning and Fulfilment, Resource Kaleidoscope, and Project Pay chain.

Our experts helped deploy 30+ SAC Stories across 12+ functions on SAP Cloud Analytics to deliver HR insights, digital boardroom capabilities, project management cockpit, and engineering cash flow insights. LTI also leveraged SAP Integration Suite for integration across HRMS solutions, customer experience solutions, planning synchronizer, and third-party master data mapping.
